Brugge, Belgium

Driven 2nd-year Applied Computer Science student with a strong interest in artificial intelligence and applied research. Built network and automation tooling in Rust and Python at Allison Off-Highway Drive & Motion Systems, and designed digital work instruction systems for manufacturing.

PROFESSIONAL EXPERIENCE

Student Manufacturing Engineering *August 2026 · 1 month*

Allison Off-Highway Drive & Motion Systems - Brugge, Belgium

- Owned design and implementation of a digital work instruction system for an assembly line.
- Revised and refined existing work instructions to improve clarity and usability.
- Enforced assembly conditions through sensors and sensor placement.
- Collaborated with machine operators to align on the most effective implementation approach.

Student IT *June 2026 - August 2026 · 3 months*

Allison Off-Highway Drive & Motion Systems - Brugge, Belgium

- Developed a network toolbox in Rust and Python to monitor and check uptime for on-premises systems.
- Optimized a logistics Python SFTP client used for automated file transfers.
- Rigorously solved problems as IT support.

Student IT *June 2025 - August 2025 · 3 months*

Dana Incorporated (now Allison Off-Highway Drive & Motion Systems) - Brugge, Belgium

- Supported the IT team with daily tasks such as setting up computers and resolving technical issues.
- Collaborated on a hands-on microcontroller project using the ESP-NOW protocol.
- Designed and created a solution to retrieve information on computers within the network.
- Collaborated with other teams to find solutions for software-related problems when upgrading computers.

PERSONAL PROJECTS

depart-now-trains

- A C++ program that tells you when to leave to catch a train in Belgium.

redis-in-go

- A basic implementation of Redis built from scratch in Go, covering the core RESP protocol and commands.

SKILLS

Languages: Rust, Kotlin, Java, C#, .NET, Python, JavaScript, TypeScript, C++, Go
Web, Mobile & Data: Vue, HTML, CSS, SQL, NoSQL
Architecture & Methodologies: Clean Architecture, Domain-Driven Design, Ports & Adapters, Agile & Scrum, CI/CD
Tools & Infrastructure: Docker, Kubernetes, Terraform
Python & Data: pandas, scikit-learn (linear & logistic regression)

EDUCATION

Bachelor of Applied Computer Science *2024 - 2027*

Howest, Brugge

ASO Diploma, Economics and Mathematics *2017 - 2023*

Sint-Leo Hemelsdaele

PERSONAL

Basketball - Team Captain, Oostkamp Two (1e provinciale)
